

# TOUCHDESIGNER INTERACTIVITY CLASS IV - MEDIAPIPE

Special thanks to Zoya Taseva

# MEDIPIPE LIBRARY FOR TOUCHDESIGNER

Mediapipe for TouchDesigner is a mediapipe library adapted for TouchDesigner. It is based on computer vision and combines several computer vision elements together.

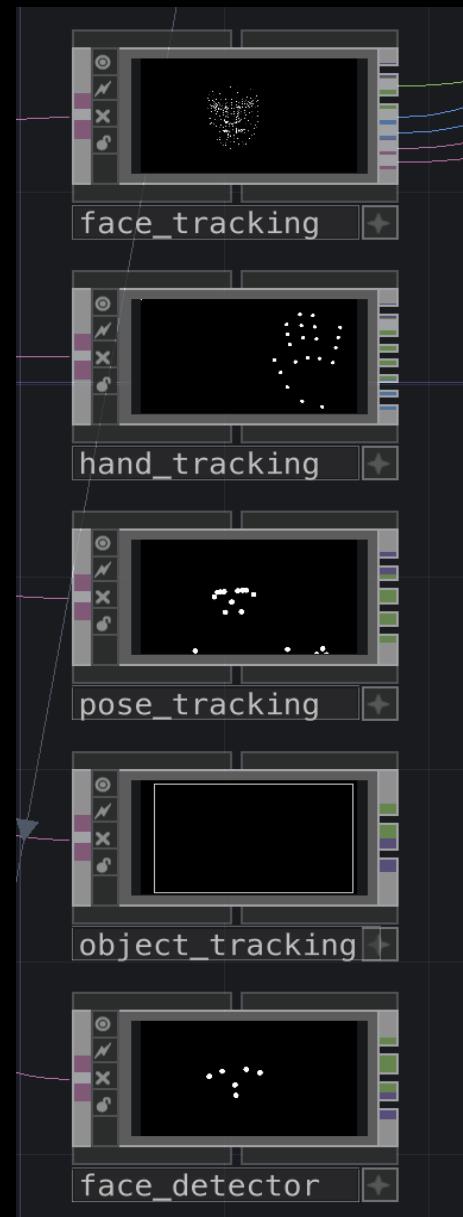

It can be found and downloaded at:  
<https://github.com/torinmb/mediapipe-touchdesigner>

# MEDIAPIPE DOES SEVERAL TRACKING ELEMENTS

It can do:

- Face tracking
- Hand tracking
- Gesture recognition
- Pose tracking
- Object tracking/recognition
- Face detection

## CAVEATS AND OBSTACLES

- So there are a few caveats or obstacles working with mediapipe.
- Because it runs on computer vision the tracking can be sluggish.
- Also because it utilizes a normal camera it is depending on the light situation. So make sure the camera can accurately see you or the audience.
